

Calcular la media y el sumatorio de varios números desde PowerShell

[crayon-6a9d606122b9d686789222/]

The screenshot shows the Windows PowerShell ISE interface. The script editor contains two lines of code: `$numeros = 2,4,5` and `$numeros | Measure-Object -Sum -Average`. The console window displays the output of the command, showing the count, average, sum, maximum, minimum, and property of the numbers.

```
1 $numeros = 2,4,5
2 $numeros | Measure-Object -Sum -Average
```

```
PS C:\Users\juan\Desktop> $numeros = 2,4,5
$numeros | Measure-Object -Sum -Average

Count      : 3
Average    : 3,66666666666667
Sum        : 11
Maximum    :
Minimum    :
Property   :
```

```
PS C:\Users\juan\Desktop>
```
