

Ejercicios de PowerShell: cambiar la afinidad de un proceso

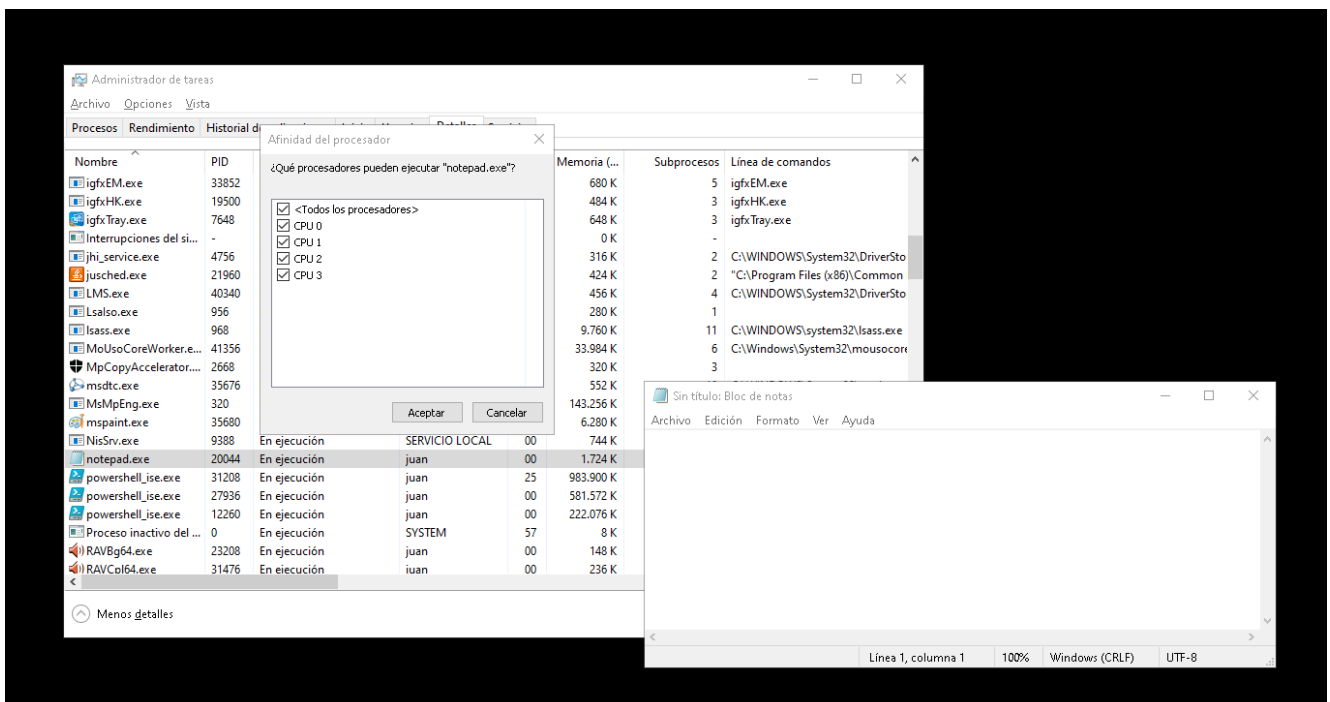

Información sobre la afinidad:
<https://www.jesusninoc.com/01/02/control-de-la-afinidad-del-procesador/>

```
$process = Get-Process -Name notepad  
[Convert]::ToString([int]$process.ProcessorAffinity, 2)
```

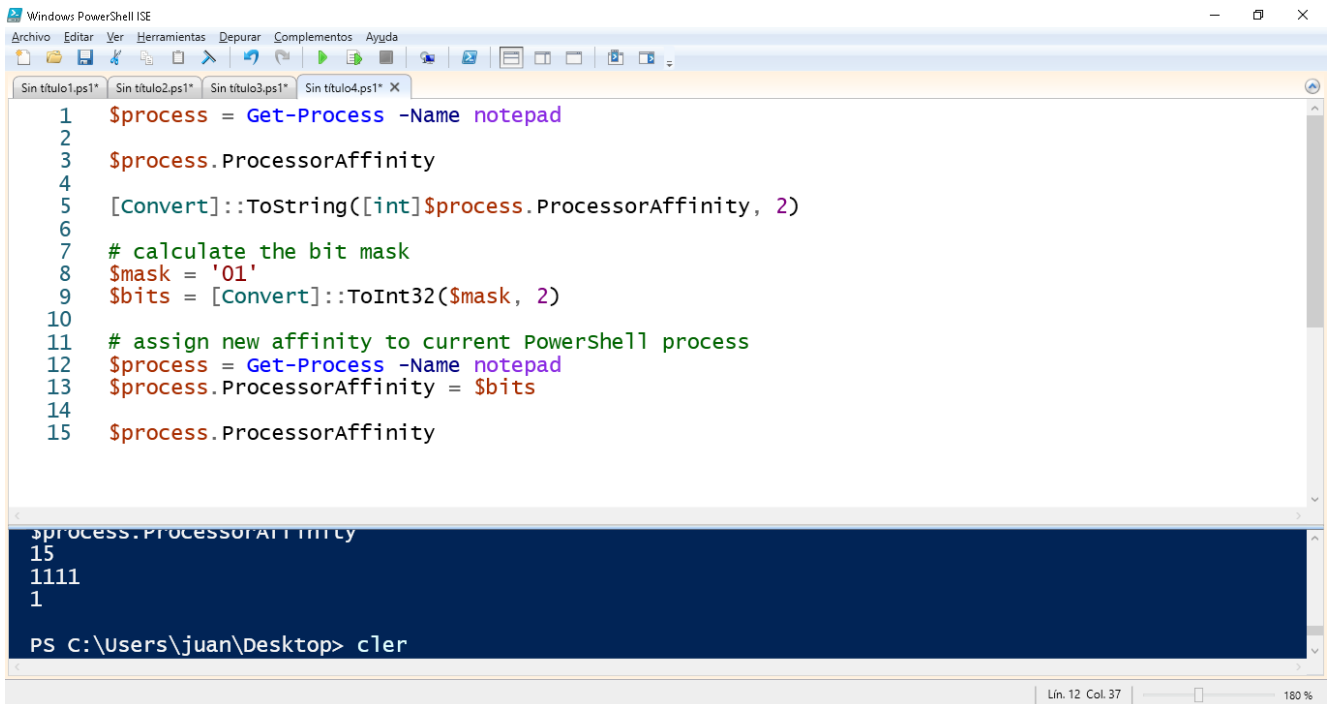

```
# calculate the bit mask  
$mask = '01'  
$bits = [Convert]::ToInt32($mask, 2)
```

```
# assign new affinity to current PowerShell process  
$process = Get-Process -Name notepad  
$process.ProcessorAffinity = $bits
```

Afinidad normal

Afinidad cambiada

```
1 $process = Get-Process -Name notepad
2
3 $process.ProcessorAffinity
4
5 [Convert]::ToString([int]$process.ProcessorAffinity, 2)
6
7 # calculate the bit mask
8 $mask = '01'
9 $bits = [Convert]::ToInt32($mask, 2)
10
11 # assign new affinity to current PowerShell process
12 $process = Get-Process -Name notepad
13 $process.ProcessorAffinity = $bits
14
15 $process.ProcessorAffinity
```
