

Ejecutar un cmdlet de PowerShell desde PHP

[crayon-6a9d5fcd67b22792979746/]

The screenshot shows the Windows PowerShell ISE interface. The editor has two tabs: 'Sin título1.ps1*' and 'Sin título2.ps1* X'. The active tab 'Sin título2.ps1*' contains a PHP script with three lines:

```
1 cd C:\xampp\php
2
3 "<?php system('powershell gps'); ?>" | .\php.exe
```

The console output shows the command being executed in the PowerShell prompt:

```
PS C:\xampp\php> cd C:\xampp\php
"<?php system('powershell gps'); ?>" | .\php.exe
```

The output is a table of system processes:

Handles	NPM(K)	PM(K)	WS(K)	CPU(s)	Id	SI	ProcessName
560	30	25352	40964	1,27	7924	67	ApplicationFrameHost
