The screenshot shows the Windows PowerShell ISE interface. The title bar reads "Windows PowerShell ISE". The menu bar includes "Archivo", "Editar", "Ver", "Herramientas", "Depurar", "Complementos", and "Ayuda". The toolbar contains icons for file operations and execution. The script editor shows a single line of PowerShell code: `1 @((Invoke-WebRequest 'http://www.bing.com/search?q=powershell').AllElements | Where-Object { $_.b_caption }) | Select-String 'scripting'`. The console window displays the output of this command, which includes several search results from Bing. The first result is from <https://technet.microsoft.com/es-es/library/bb978526.aspx> and describes Windows PowerShell as a task-based command-line shell and scripting language. The second result is from <https://technet.microsoft.com/en-us/library/bb97852604/08/2014> and describes Windows PowerShell as a command-line shell and scripting language. The third result is from <https://support.microsoft.com/en-us/kb/96892908/04/2014> and describes Windows PowerShell as a command-line shell and scripting language. The console window also shows the prompt `PS C:\Windows\System32>`. The status bar at the bottom indicates "Lin. 11 Col. 42" and "100 %".
