

Pedir datos al usuario desde PowerShell

[crayon-6a9d78a11bdca095968411/]

```
PS /Users/lamac> Read-Host "Introduzca edad"
Introduzca edad: 55
55
PS /Users/lamac>
```

The screenshot shows a PowerShell terminal window with a dark background. The title bar at the top indicates the window is titled 'lamac — powershell — 80x9'. The terminal content shows a PowerShell prompt 'PS /Users/lamac>' followed by the command 'Read-Host "Introduzca edad"'. The command outputs 'Introduzca edad: 55', and the user has entered '55' at the prompt. The prompt returns to 'PS /Users/lamac>'.
