The screenshot shows the Windows PowerShell ISE interface. The title bar reads "Windows PowerShell ISE". The menu bar includes "Archivo", "Editar", "Ver", "Herramientas", "Depurar", "Complementos", and "Ayuda". The toolbar contains various icons for file operations and execution. The editor window, titled "Sin título1.ps1*", contains a single line of PowerShell code: `1 Get-PnpDevice | Where-Object { $_.class -EQ 'USBDevice' } | Select-Object FriendlyName`. The console window below shows the command being executed in the context of "PS C:\Users\juan>". The output displays the "FriendlyName" property for the detected USB devices, showing "C6603", "GRACE", and "GRACE" separated by horizontal lines. The status bar at the bottom indicates "Completado", "Lín. 1 Col. 87", and a zoom level of "100 %".
