

Buscar un dominio con un nombre aceptable en .onion (crear dominios con extensión onion)

Para buscar un dominio .onion que sea aceptable es necesario utilizar la herramienta:

<https://github.com/katmagic/Shallot>

Shallot en funcionamiento

[crayon-6a9d7997abdb9149831064/]

```
Shallot — root@81b79518ace5: /Shallot — docker run -it ubuntu — 134x28

[root@81b79518ace5:/Shallot# ./shallot ^jesus
