

Split users and passwords

[crayon-6a9d5f6eed8ee581359717/]

The screenshot shows the Windows PowerShell ISE interface. The top menu bar includes 'Archivo', 'Editar', 'Ver', 'Herramientas', 'Depurar', 'Complementos', and 'Ayuda'. The toolbar contains icons for file operations and execution. The script editor shows a file named 'Sin título1.ps1' with the following code:

```
1 "javier:1234#2@aa" | Out-File alum.txt
2
3 $usuarios=Get-Content alum.txt
4 foreach($i in $usuarios)
5 {
6     $partir=$i.split(":")
7     $partir[0]
8     $partir[1]
9 }
```

The console window shows the execution of the script:

```
PS C:\Users\juan> "javier:1234#2@aa" | Out-File alum.txt
$usuarios=Get-Content alum.txt
foreach($i in $usuarios)
{
    $partir=$i.split(":")
    $partir[0]
    $partir[1]
}
javier
1234#2@aa
PS C:\Users\juan>
```

The status bar at the bottom indicates 'Completado' (Completed), 'Lín. 13 Col. 19', and a zoom level of '110 %'.
