

Crear un reloj sencillo en Python mediante hilos

[crayon-6a9d6030a2493238953935/]

```
lamac@lamacs-MacBook-Air-2 ~ % python3.10 reloj.py  
19:09:34  
19:09:35  
19:09:36  
19:09:37
```

A terminal window titled "lamac — Python reloj.py — 80x24" showing the execution of a Python script. The prompt is "lamac@lamacs-MacBook-Air-2 ~ %". The script outputs the current time in HH:MM:SS format for four consecutive seconds: 19:09:34, 19:09:35, 19:09:36, and 19:09:37. A cursor is visible on the line following the last output.
