

Algoritmo de descifrado sencillo

[crayon-6a9d6780660d3435069085/]

The screenshot shows the Windows PowerShell ISE interface. The menu bar includes Archivo, Editar, Ver, Herramientas, Depurar, Complementos, and Ayuda. The toolbar contains icons for file operations and execution. A single script file named 'Sin título1.ps1' is open. The script contains three lines of PowerShell code: 1. `$cifrado="ijklmnopqr(ijkl"`, 2. `$var=8`, and 3. `(0..($cifrado.Length-1) | % {[char]::ConvertFromUtf32([char]::ConvertToUtf32($cifrado[$_].ToString(),0)-$var)}) -join ""`. The console window below shows the execution of these commands, resulting in the output 'abcdefghijklmnopqr(ijkl'.

```
Sin título1.ps1* X
1 $cifrado="ijklmnopqr(ijkl"
2 $var=8
3 (0..($cifrado.Length-1) | % {[char]::ConvertFromUtf32([char]::ConvertToUtf32($cifrado[$_].ToString(),0)-$var)}) -join ""

PS C:\Users\juan> $cifrado="ijklmnopqr(ijkl"
$var=8
(0..($cifrado.Length-1) | % {[char]::ConvertFromUtf32([char]::ConvertToUtf32($cifrado[$_].ToString(),0)-$var)}) -join ""
abcdefghijklmnopqr(ijkl

PS C:\Users\juan>
```
