

Create a timestamp in PowerShell (with AddDays and -Format)

[crayon-6a9d832bf30a6415109129/]

The screenshot shows a Windows PowerShell ISE window with a menu bar (Archivo, Editar, Ver, Herramientas, Depurar, Complementos, Ayuda) and a toolbar. The script editor contains three lines of PowerShell code:

```
1 $Temp = ([datetime]"01/01/2020 00:00").AddDays($_)
2 $fecha = Get-Date $Temp -Format o
3 $fecha
```

The console output shows the execution of the script:

```
PS C:\Users\juan> $Temp = ([datetime]"01/01/2020 00:00").AddDays($_)
$fecha = Get-Date $Temp -Format o
$fecha
2020-01-01T00:00:00.0000000
PS C:\Users\juan> |
```

The status bar at the bottom indicates "Lin. 6 Col. 19" and "120 %".
