

Instalar el rol de IIS y ASP.NET 4.5 mediante PowerShell DSC (Desired State Configuration)

[crayon-6a9e0e5d4ee46088106103/]

```
1 Configuration ServidorWeb{
2     param(
3         [string[]]$computerName="localhost"
4     )
5
6     Node $computerName{
7
8         #Install IIS Role
9         WindowsFeature IIS{
10             Ensure = "Present"
11             Name = "Web-Server"
12         }
13
14         #Install ASP.NET 4.5
15         WindowsFeature ASP
16         {
17             Ensure = "Present"
18             Name = "Web-Asp-Net45"
19         }
20     }
21 }
22
23 ServidorWeb
```

Ensure = "Present"
Name = "Web-Asp-Net45"
