The screenshot shows the Windows PowerShell ISE interface. The title bar reads "Windows PowerShell ISE". The menu bar includes "Archivo", "Editar", "Ver", "Herramientas", "Depurar", "Complementos", and "Ayuda". The toolbar contains icons for file operations, editing, and execution. A tab titled "Sin título1.ps1" is open. The script editor shows two lines of code: `1 cd "C:\adb"` and `2 .\adb shell service list`. The console window displays the output of these commands: `PS C:\adb> cd "C:\adb"`, `.\adb shell service list`, and `Found 141 services:`. It then lists 15 services with their corresponding Java interfaces, such as `0 internet_audio: []`, `1 perfhub: [android.os.IPerfHub]`, and `15 isms: [com.android.internal.telephony.ISms]`. The status bar at the bottom indicates "Completado" and "Lin. 2 Col. 25" with a 100% zoom level.
