

Buscar si hay una GPO configurada en el equipo con PowerShell

[crayon-6a9d83f446e9c082759361/]

The screenshot shows the Windows PowerShell ISE interface. The script in the editor is as follows:

```
1 $resulta = gpresult /z
2 foreach ($lineas in $resulta)
3 {
4     if ($lineas -match "CMD")
5     {
6         $lineas
7     }
8 }
```

The console output shows the execution of the script, displaying the path to the GPO 'quitarCMD'.

```
PS C:\Users\pepin> $resulta = gpresult /z
foreach ($lineas in $resulta)
{
    if ($lineas -match "CMD")
    {
        $lineas
    }
}
quitarCMD
GPO: quitarCMD
Id. de carpeta: Software\Policies\Microsoft\Windows\System\DisableCMD
PS C:\Users\pepin> |
```

The status bar at the bottom indicates 'Completado' (Completed) and shows the cursor is at line 13, column 20, with a zoom level of 155%.
