

Listar los nombres de las GPOs que se han creado en un Windows Server

[crayon-6a9dd4a2ec376043738268/]

The screenshot shows the Windows PowerShell ISE interface. The command `Get-GPO -All | Select-Object DisplayName` has been entered and executed. The output displays a list of Group Policy Objects (GPOs) with their display names.

```
PS C:\Users\Administrador> Get-GPO -All | Select-Object DisplayName

DisplayName
-----
ejemplo
Default Domain Policy
firewall
quitarCMD
anadirPermisos
Default Domain Controllers Policy

PS C:\Users\Administrador>
```

The status bar at the bottom indicates "Completado" (Completed) and shows the cursor is at line 14, column 28, with a zoom level of 130%.
