

Ver las propiedades estáticas de la clase [System.Console] desde PowerShell

[System.Console] Representa los flujos de entrada, salida y error estándar para las aplicaciones de consola. Esta clase no puede heredarse.

[crayon-6a9dcb714e00b822789941/]

The screenshot shows the Windows PowerShell ISE interface. The command window displays the output of the `Get-Member -Static -MemberType Properties` command applied to `[System.Console]`. The output lists 17 static properties of the `System.Console` class, including `InputEncoding`, `IsErrorRedirected`, `IsInputRedirected`, `IsOutputRedirected`, `KeyAvailable`, `LargestWindowHeight`, `LargestWindowWidth`, `NumberLock`, `Out`, `OutputEncoding`, `Title`, `TreatControlCAsInput`, `WindowHeight`, `WindowLeft`, `WindowTop`, and `WindowWidth`. Each property is shown with its type and a brief description of its getter and setter methods. Below the list, the command `[System.Console]::BackgroundColor` is entered, and the output `Black` is displayed. The status bar at the bottom indicates 'Completado' and 'Lin. 2 Col. 34'.

```
1 [System.Console] | Get-Member -Static -MemberType Properties
2 [System.Console]::BackgroundColor

InputEncoding      Property static System.Text.Encoding InputEncoding {g...
IsErrorRedirected  Property static bool IsErrorRedirected {get;}
IsInputRedirected  Property static bool IsInputRedirected {get;}
IsOutputRedirected Property static bool IsOutputRedirected {get;}
KeyAvailable       Property static bool KeyAvailable {get;}
LargestWindowHeight Property static int LargestWindowHeight {get;}
LargestWindowWidth Property static int LargestWindowWidth {get;}
NumberLock         Property static bool NumberLock {get;}
Out                Property static System.IO.TextWriter Out {get;}
OutputEncoding     Property static System.Text.Encoding OutputEncoding {...
Title              Property static string Title {get;set;}
TreatControlCAsInput Property static bool TreatControlCAsInput {get;set;}
WindowHeight       Property static int WindowHeight {get;set;}
WindowLeft         Property static int WindowLeft {get;set;}
WindowTop          Property static int WindowTop {get;set;}
WindowWidth        Property static int WindowWidth {get;set;}

PS C:\Users\juan> [System.Console]::BackgroundColor
Black
