

Crear un formulario mediante el espacio de nombres System.Windows.Forms con C# desde PowerShell

```
$CodigoC = @"
```

```
using System.Windows.Forms;
```

```
public class SimpleHello : Form  
{
```

```
    public static void Main()
```

```
    {
```

```
        Application.Run(new SimpleHello());
```

```
    }
```

```
    public SimpleHello()
```

```
    {
```

```
        Text = "Hola";
```

```
    }
```

```
}
```

```
"@
```

```
Add-Type -TypeDefinition $CodigoC -ErrorAction  
SilentlyContinue -ReferencedAssemblies System.Windows.Forms
```

```
[SimpleHello]::Main()
```
