

¿Cómo iniciar una aplicación en Android con ADB?

Para saber qué Actividad hay que abrir, lo mejor es observar el log en tiempo real:

[crayon-6a9d5fb73b65a044182139/]

A screenshot of the Windows PowerShell ISE interface. The title bar reads 'Windows PowerShell ISE'. The menu bar includes 'Archivo', 'Editar', 'Ver', 'Herramientas', 'Depurar', 'Complementos', and 'Ayuda'. The toolbar contains icons for file operations and development tools. The script editor shows three lines of code: 1. `cd "C:\Users\juan\Downloads\platform-tools_r31.0.2-windows\platform-tools"`, 2. `.\adb logcat`, and 3. `| Select-String "com.zepni.dinosaur"`. The console window at the bottom displays the output of the logcat command, showing system logs for the 'com.zepni.dinosaur' application, including window manager events and alarm manager actions. The status bar at the bottom right indicates 'Lin. 3889 Col. 136' and a zoom level of '130 %'.

Una vez que sabemos la Actividad, la llamamos de la siguiente forma:

[crayon-6a9d5fb73b660240342136/]

Windows PowerShell ISE

Archivo Editar Ver Herramientas Depurar Complementos Ayuda

Sin título1.ps1 X

```
1 cd "C:\Users\juan\Downloads\platform-tools_r31.0.2-windows\platform-tools"
2
3 .\adb shell am start com.zepni.dinosaur/com.unity3d.player.UnityPlayerActivity
```

PS C:\Users\juan\Downloads\platform-tools_r31.0.2-windows\platform-tools> cd "C:\Users\juan\Downloads\platform-tools_r31.0.2-windows\platform-tools"

.\adb shell am start com.zepni.dinosaur/com.unity3d.player.UnityPlayerActivity
