

How to find Windows uptime?

[crayon-6a9dcb0bf2fe7223114980/]

The screenshot shows the Windows PowerShell ISE interface. The menu bar includes Archivo, Editar, Ver, Herramientas, Depurar, Complementos, and Ayuda. The toolbar contains icons for file operations and execution. A single tab titled 'Sin título1.ps1*' is open. The script editor contains two lines of PowerShell code: `1 net statistics server | Select-String "stics since"` and `2 net statistics server | Select-String "sticas desde"`. The console window below shows the output of the second command: `PS C:\Users\juan> net statistics server | Select-String "sticas desde"` followed by `Estadísticas desde 24/07/2017 17:51:05`. The status bar at the bottom indicates 'Completado', 'Lín. 2 Col. 53', and '100 %'.

```
Sin título1.ps1* X
1 net statistics server | Select-String "stics since"
2 net statistics server | Select-String "sticas desde"

PS C:\Users\juan> net statistics server | Select-String "sticas desde"
Estadísticas desde 24/07/2017 17:51:05

PS C:\Users\juan>

Completado | Lín. 2 Col. 53 | 100 %
```
