

Habilitar BitLocker

[crayon-6a9d5fdcb1497488241748/]

The screenshot shows the Windows PowerShell ISE interface. The command prompt shows the execution of the `Enable-BitLocker -MountPoint "F:" -RecoveryPasswordProtector -UsedSpaceOnly -Verbose` command. The output indicates that the operation is successful and provides a recovery password. The output also includes a table showing the volume status and encryption details.

```
PS D:\> Enable-BitLocker -MountPoint "F:" -RecoveryPasswordProtector -UsedSpaceOnly -Verbose
DETAILED: Se está realizando la operación "Enable-BitLocker" en el destino "F:".
ADVERTENCIA: ACCIONES NECESARIAS:

1. Guarde esta contraseña de recuperación numérica en un lugar seguro, lejos del equipo:

Para evitar la pérdida de datos, guarde esta contraseña inmediatamente, ya que le ayudará a desbloquear el volumen cifrado.
