

Gets a connection profile

[crayon-6a9d829f2654a890074058/]

The screenshot shows the Windows PowerShell ISE interface. The menu bar includes Archivo, Editar, Ver, Herramientas, Depurar, Complementos, and Ayuda. The toolbar contains icons for file operations and execution. A script file named 'Sin título1.ps1*' is open, containing the command '1 Get-NetConnectionProfile'. The console window shows the command being executed at the prompt 'PS C:\Users\juan>'. The output is a list of network connection profile details.

```
PS C:\Users\juan> Get-NetConnectionProfile

Name           : wlan_ja22  2
InterfaceAlias  : Wi-Fi
InterfaceIndex  : 11
NetworkCategory : Public
IPv4Connectivity : Internet
IPv6Connectivity : LocalNetwork

PS C:\Users\juan>
```

At the bottom, the status bar indicates 'Completado', 'Lín. 14 Col. 19', and a zoom level of '100 %'.
