

Mostrar enlaces de una web usando JavaScript

[crayon-6a9d5e1684433148005005/]

The screenshot shows a web browser window with the address bar displaying `https://www.jesusninoc.com/`. The developer tools are open, and the console tab is selected. The console shows the following JavaScript code and its output:

```
> var links = document.links;

for(var i=0;i<links.length;i++)
{
    console.log("Enlace#"+(i+1)+"-"+links[i].href);
}
```

The output in the console lists 27 links, each followed by a VM identifier (e.g., VM148:5). The links are:

- Enlace#1: <https://www.jesusninoc.com/#content>
