

Reemplazar por arte de magia en PowerShell (Convert-String)

[crayon-6a9d6fc9038ed293591909/]

The screenshot shows the Windows PowerShell ISE interface. The menu bar includes Archivo, Editar, Ver, Herramientas, Depurar, Complementos, and Ayuda. The toolbar contains icons for file operations, editing, and execution. A script file named 'Sin título1.ps1*' is open, containing the following command on line 1:

```
1 "Jesus Ninoc" | Convert-String -Example "Bill Gates=Gates, B.," "John Smith=Smith, J."
```

The console window below shows the execution of this command. The prompt is 'PS C:\Users\juan>'. The command is entered, and the output is displayed on the next line:

```
PS C:\Users\juan> "Jesus Ninoc" | Convert-String -Example "Bill Gates=Gates, B.," "John Smith=Smith, J."  
Ninoc, J.  
  
PS C:\Users\juan>
```

The status bar at the bottom indicates 'Completado' (Completed), 'Lín. 1 Col. 86', and a zoom level of '95 %'.
