

Select processes and companies

[crayon-6a9d50f768bc0872237792/]

The screenshot shows the Windows PowerShell ISE interface. The command prompt shows the command `Get-Process | select Company, Name` being executed. The output is a table of processes and their companies.

```
PS D:\> Get-Process | select Company, Name
```

Company	Name
Google Inc.	chrome
