

Automatizar el recorrido de niveles de un sitio web, obteniendo información de todos los enlaces del sitio y añadir la información creando una clase a un array

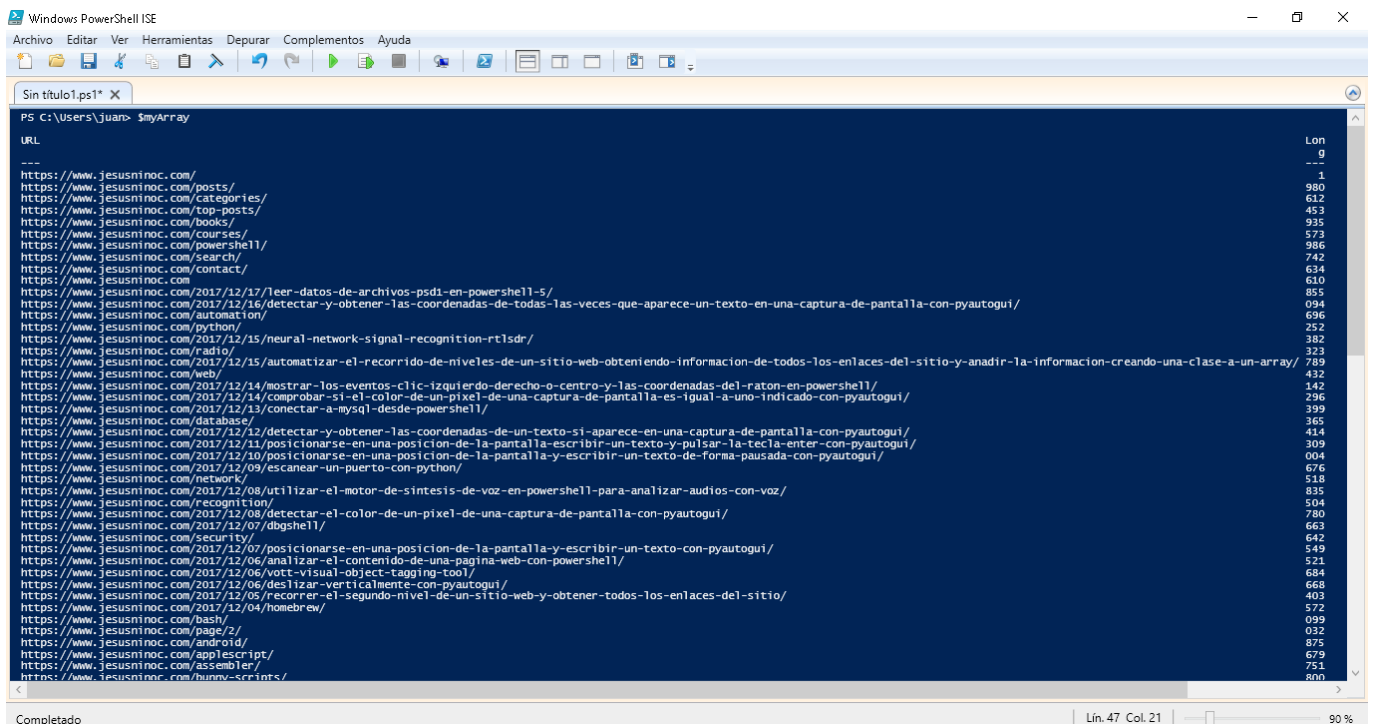

[crayon-6a9d58240a8ca813939616/]

Resultado de la ejecución del script

Ver el contenido del array con la clase Enlace

```
PS C:\Users\Juan> $myArray

URL                                                                    Lon
