

Leer datos de archivos .PSD1 en PowerShell 5

[crayon-6a9d5794459ed878996399/]

The screenshot shows the Windows PowerShell ISE interface. The top pane contains a PowerShell script with the following code:

```
1 "@{"
2   Nombre = "Javier"
3   Apellidos = "Monte"
4 }" | Out-File fichero.psdl
5
6 $datos = Import-PowerShellDataFile -Path .\fichero.psdl
7 $datos
```

The bottom pane shows the execution of the script. The output is a table with two columns: Name and Value.

Name	Value
Nombre	Javier
Apellidos	Monte

The status bar at the bottom indicates "Completado" (Completed) and shows the current line and column as "Lín. 7 Col. 7".
