The screenshot shows the Kotlin Playground interface. At the top, there's a header with the Kotlin logo and navigation links: Solutions, Docs, Community, Teach, and Play. Below the header, there's a toolbar with a version dropdown (1.9.21), a JVM dropdown, a text input field for "Program arguments", and buttons for "Copy link", "Share code", and "Run". The main area contains a Kotlin code snippet:

```
fun main() {  
    val a = 0b1010 // Representación binaria de 10  
    val b = 0b1100 // Representación binaria de 12  
  
    val result = a or b // Operación OR bit a bit  
  
    println("Resultado de a OR b: $result") // Imprime: Resultado de a OR b: 14  
}
```

At the bottom, there's a console area showing the output: "Resultado de a OR b: 14".
