

Subscribe to the Azure Video Indexer API

1. Sign in. To start developing with Video Indexer, you must first Sign In to the [Video Indexer](#) portal.

Sign-In

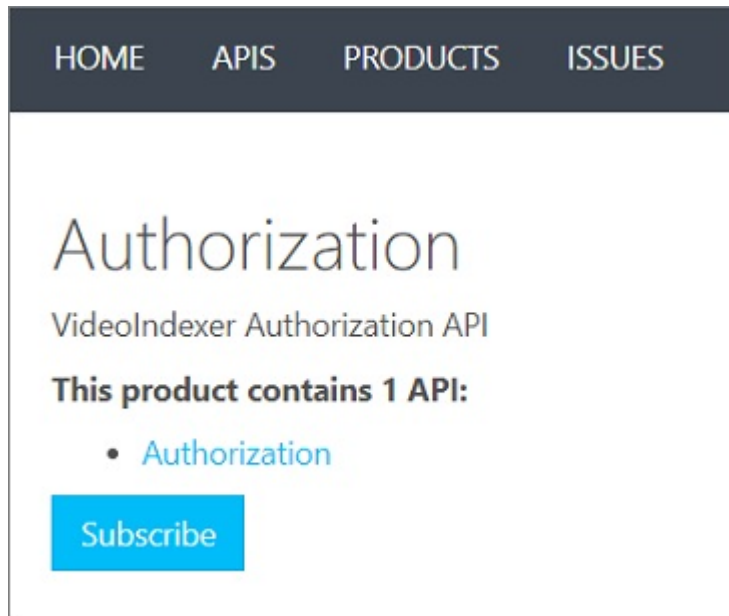

By signing in I agree to [Microsoft Service Agreement](#) and the [Privacy Statement](#).

If signing in with an AAD account (for example, `alice@contoso.onmicrosoft.com`) you must go through two preliminary steps:

1. Contact us to register your AAD organization's domain (`contoso.onmicrosoft.com`).
2. Your AAD organization's admin must first sign in to grant the portal permissions to your org. To do

this, the organization's admin must navigate to https://login.microsoftonline.com/common/adminconsent?client_id=e97b04d3-3e10-41fb-926f-b3c868fef6df&redirect_uri=https://videobreakdown.portal.azure-api.net/signin-aad, sign in and give consent.

2. Subscribe. Select the [Products](#) tab. Then, select Production and subscribe.

Once you subscribe, you will be able to see your subscription and your primary and secondary keys. The keys should be protected. The keys should only be used by your server code. They should not be available on the client side (.js, .html, etc.).

Your subscriptions

Subscription details			Product	State
Subscription name	Production	Rename	Production	Active
Started on	11/09/2016			
Primary key	xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Show Regenerate		
Secondary key	xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx	Show Regenerate		

3. Start developing. You are ready to start integrating with the API. Find the detailed description of each Video Indexer REST API [here](#).
